

A/Prof Darren Katz

Urological Surgeon
Male Fertility Microsurgeon

A/Prof Darren Katz is a urological surgeon who serves as **Medical Director** of Men's Health Melbourne. He is also the **immediate past Leader** of the Andrology Special Advisory Group to the Urological Society of Australia and New Zealand. He is a very approachable urologist who understands the importance of providing patients with the **highest standards of multi-disciplinary care**. His aim is to deliver **prompt, ready-access** to all forms of urological management – either elective or emergency – and is **available 24/7 to GPs and patients**.

A/Prof Katz graduated from Melbourne University Medical School in 2001 and completed his specialist urological training with the Royal Australasian College of Surgeons. He has spent **2 years at world-leading hospitals**, Memorial

Sloan-Kettering Cancer Center and Weill-Cornell Medical Centre, in New York completing sub-speciality urological fellowships in andrology, urological prosthetics, male voiding dysfunction, incontinence and male infertility.

A/Prof Katz is heavily involved with **research and academics** and has been awarded both **national and international grants and scholarships**. He has been an **invited faculty member** for numerous urological workshops to teach other urologists and training urologists about the latest surgical techniques. A/Prof Katz often presents his data at **major international conferences**. He is the author of **multiple peer-reviewed journal articles** and is often asked by various media organisations for his **expert commentary** on various urological issues.

Men's Health Melbourne is a multidisciplinary full-service urological centre. There are specialist urological surgeons, a men's health physician and nurses to provide the best care for any urological problem.

The clinic has multiple sites which A/Prof Katz consults and operates from including:

- Melbourne CBD (Collins Street)
- Holmesglen Private Hospital (Moorabbin)
- Cabrini Hospital (Malvern)
- Epworth Hospital (Richmond)
- Warragul Hospital

Specialist Services at MHM:

- Minimally invasive prostate surgery
- Kidney stones - same day laser treatment, prevention strategies
- Erectile dysfunction and penile implant surgery
- Male infertility (Vasectomy reversal, microsurgical sperm harvesting procedures)
- Raised PSA management (Including MRI-ultrasound fusion biopsy)
- Male voiding dysfunction including anti-incontinence procedures
- General Urology (circumcision, cancers of kidney, bladder and prostate, Peyronie's Disease)
